

WHAT IS A HUMIDIFIER CERTIFICATION STANDARD?

Humidifiers that are Certified **asthma & allergy friendly™** are tested to the ASP:18-01/101 Humidifier Certification Standard.

The Certification process uses proprietary and recognized scientific techniques to assess Humidifiers for their capacity to contribute to the goal of thermal comfort without adversely affecting indoor air quality. Product samples that pass Certification testing are granted a Certificate stating that the particular Humidifier meets the requirements for the **asthma & allergy friendly™** ASP:18-01/101 Certification Standard.

The Humidifier standard includes evaluation of the:

- (a) capability of humidifiers to achieve and maintain set relative humidity levels
- (b) capacity of humidifiers to sanitize the water used during operation
- (c) effect of humidifiers on pre-existing contamination in the room in which they are operated

All Certified **asthma & allergy friendly™** Humidifiers carry a unique Certification code.

Certified **asthma & allergy friendly™** and the **asthma & allergy friendly™** symbol are Certification marks and registered trademarks of Allergy Standards Limited. Please note the Certification algorithms developed by Allergy Standards Ltd are subject to patent protection.

The **asthma & allergy friendly™** Humidifier Certification Standard ASP:18-01/101 has been approved and adopted by The Asthma and Allergy Foundation of America. COPYRIGHT 2015 ALLERGY STANDARDS LIMITED. ALL RIGHTS RESERVED
