Certified Products Guide

Help Improve Air Quality and Reduce Exposure to Allergens and Asthma Triggers

The following products have earned the Asthma & Allergy Friendly® Certification as of January 2025. This means they were independently tested and confirmed to adhere to strict scientific standards developed by the Asthma and Allergy Foundation of America (AAFA) and Allergy Standards Limited (ASL). The products must meet all of the standards to earn the Certification Mark and prove they are better suited for people with asthma and allergies. This list may change as products are added or removed. For more information, visit: aafa.org/certified

Look for this mark on product packages or company websites!

Air Cleaners

Portable Air Cleaners

- **CleanForce** – CleanForce Rainbow Air Purifier
- **LG USA** – PuriCare 360 Single Filter Air Purifier with Clean Booster
- **LG USA** – PuriCare™ AeroTower™ Air Purifier

- **Sijo Home** – AiryWeight Eucalyptus Mattress Protector

Pillow Encasings

- **National Allergy®** – BedCare Cotton Pillow Cover
- **SmartSilk™** – Pillow Protector Standard

Did You Know?

The 2020 Focused Updates to the Asthma Management Guidelines now offer steps you can take to reduce indoor asthma and allergy triggers. The guidelines recommend using several steps (not just one!) to reduce certain triggers in your home.

AAFA joined with ASL to create the **Asthma & Allergy Friendly®** Certification Program to address the needs of people in the U.S. with asthma and allergies. In alignment with the new guidelines, the program helps support a multi-component strategy for healthier indoor spaces. Using Certified **Asthma & Allergy Friendly®** products and AAFA's healthier home checklist can help you reduce asthma and allergy triggers in your home. You can find the checklist at: aafa.org/healthyhomes

Bedding

Pillows

- **Downlite** – Breathe Easy Pillow

Robot Vacuums

- **LG USA** – R9 Plus

Water Based Filtration Vacuums

- **Rexair LLC** – The Rainbow® Cleaning System (Vacuum Cleaner with Water Filter)

The Asthma & Allergy Friendly[®] Certification Process

AAFA and ASL conduct market research and listen to feedback from AAFA's asthma and allergy community about consumers' needs.

How We Develop Standards

ASL reviews scientific research, clinical studies, related national and international standards and best practices.

ASL conducts experimental product testing.

ASL develops the standard for the product category, including strict criteria to which any products will be tested.

The standard is sent to the board of directors for AAFA and ASL for review and approval.

AAFA's independent Medical Scientific Council reviews the proposed standard and provides expert feedback.

How We Test Products

Companies send their products to independent labs for testing. ASL manages the testing process to ensure strict guidelines are followed.

Products and companies are reviewed to see if their product is a good fit for the **Asthma & Allergy Friendly[®]** Certification Program.

Products must pass every test required in the standard in order to qualify for **Asthma & Allergy Friendly[®]** Certification.

Each Certified product has a certificate and is associated with a unique certification code.

About the Asthma and Allergy Foundation of America (AAFA)

Founded in 1953, AAFA is the oldest and largest non-profit patient organization dedicated to saving lives and reducing the burden of disease for people with asthma, allergies, and related conditions through research, education, advocacy, and support. AAFA offers extensive support for individuals and families affected by asthma and allergic diseases, such as food allergies and atopic dermatitis (eczema). Through its online patient support communities, network of regional chapters, and collaborations with community-based groups, AAFA empowers patients and their families by providing practical, evidence-based information and community programs and services. AAFA is the only asthma and allergy patient advocacy group that is certified to meet the standards of excellence set by the National Health Council. For more information, visit: aafa.org

About Allergy Standards Limited (ASL)

As an independent, international certification company, we create peer-reviewed, scientific standards for a wide range of products and services to determine their impact on indoor air quality. ASL's intellectual property portfolio includes unique protocols for products to be Certified **Asthma & Allergy Friendly**[®]. Our mission is to make the United Nations human right to breathe clean air a reality, through science (Standards), education (Academy) and innovation (Institute). allergystandards.com
